

SHARE THE RIDE

Drive less. Save more.

Save more money.

Breathe cleaner air.

Spend less time driving.

Sun Rideshare, a regional commuter assistance program, helps residents in Pima County connect with affordable, reliable and convenient transportation options. Our online carpool-matching database provides a free and simple way to find others already going your way, so you can spend less money, create less air pollution, and feel less stress on the road by sharing the ride.

With **Sun Rideshare**, you decide how often to carpool and which drivers or riders are a match for you. Sign up for match alerts and watch your options grow as the database grows.

SAVE MORE. The average driver spends more than \$8,400 per year on car payments, fuel, insurance, parking and maintenance costs.* By carpooling regularly, you can reduce your overall out-of-pocket costs.

LIVE HEALTHY. In Pima County, motor vehicle emissions are the major human-made source of air pollution. At high levels, air pollutants can make breathing difficult and can damage our hearts and lungs. Leaving your car at home for even one day each week can make a difference in the air we all breathe.

FREE YOURSELF. The average one-way commute time by car in Pima County is 23 minutes,** so being a carpool passenger just four times per month could free up more than 180 minutes for the average commuter. That's a lot of time to read, text, surf the web, sleep, catch up on work, pay online bills—whatever you need.

Register at SunRideshare.org and find your carpool match today!
