## **FY 2005-2009**

### **Project Listing**

## APPENDIX 1 - FY 2005 - 2009 TIP TABLES

The tables on the following pages present PAG's Regional TIP for the five-year period beginning in FY 2005 and ending with FY 2009. Project priorities are indicated by the year during which the project is programmed to utilize the designated funds. For federally funded projects, the year programmed refers to the federal fiscal year ending September 30th. For state and locally funded projects from sources other than federal, the year programmed refers to the fiscal year ending June 30th.

The TIP includes federally funded transportation system improvements (highways, transit, airports, etc.) and, for informational purposes, non-federally funded transportation system improvements of regional significance. The project sponsor is the agency responsible for implementation and is identified with each project. The tables present information in columns that cover the following:

1. TIP ID: Each project has a project ID number that is used to identify the projects in the text and on any reference maps.
2. Project Name: Each project is identified by its location and beginning and ending points, where applicable.
3. Project Description: The general scope of each project is described.
4. Length: The length of the project in miles, where applicable.
5. Total Cost: The total cost of the project including studies, design and construction in thousands of dollars.
6. Yearly Costs: Costs associated with the project in the years one to five as applicable in thousands of dollars.
7. Phase: Phase indicates whether the funds are programmed for Study, (D) Design, (R) Right of Way, or (C) Construction
8. Funding Source: The funding source or sources. Funding source acronyms are listed in Appendix 3.

\* Unless otherwise designated, the funding ratio for STP projects is assumed to be 94.3% federal and 5.7% local match. Transit projects are 80% federal and 20% local match unless otherwise shown. These ratios conform to historical ratios.

# How to read the TIP Projects List

Project funding for year (in thousands)

Funding source

Project year (July 1 to June 30)

Project phase for year (C=construction, D=design, etc.)

Agency responsible for implementation

Project was tested and analyzed for air quality conformity in the model
